● ABOUT ME

Full Stack Software Engineer specializing in **Front end & mobile** engineering with 5 years of experience building products with a strong focus on scalable code architectures and performant UIs while ensuring responsiveness across a variety of screen types.

My professional experience in software engineering consists of writing web and mobile applications for startups both as front and back end developer as well as writing automation and integration tests. I am a **fast learner** and can adapt to teams and new technologies with ease.

● SKILLS

Front end

React.js | React Native | React Query | React Context API | Responsive Web Design | Angular (RxJS, NgRX, PrimeNG) | Tailwind

Back end

NodeJS | Databases(PostgreSQL, MySQL, MongoDB) | RestAPIs | JWT Authentication

Languages, Tools etc

TypeScript | Firebase | CI/CD (Github actions) | Docker | Mobile native code (Java, Kotlin, Swift)

● WORK EXPERIENCE

SENIOR REACT NATIVE DEVELOPER – BASE ELEMENT – 01/06/2025 – Current – NICOSIA, REMOTE., CYPRUS

- Upgraded large-scale **React Native** applications with **thousands of active users** by migrating to the latest React Native versions and updating Android/iOS target SDKs, ensuring compatibility and long-term stability.
- Designed and implemented **complex** and **high-impact features** with smooth, performant **animations and interactive UI components**.
- Improved application **performance** and maintainability by refactoring legacy code, integrating modern libraries, and following best practices in React Native and TypeScript.
- Collaborated closely with product managers, designers, and QA teams to deliver new functionality while maintaining high-quality user experience across platforms.
- Troubleshooted and resolved critical platform-specific issues (Android & iOS), ensuring **seamless cross-platform performance**.

FULL STACK SOFTWARE ENGINEER – KANELIS DEVELOPMENT LABS (KDL) – 01/10/2023 – 10/06/2025 – REMOTE, GREECE

- Developed mobile applications using **React Native** and **TypeScript**, with strong focus on **React hooks** for state and lifecycle management.
- Built and maintain a form submission web application using **Angular** with **NgRX** for reactive state management on the front end and **Express.js** with **PostgreSQL** for back-end services, including authentication and data storage. Hosted said application in an **Ubuntu** server using **Docker** containers and **Nginx** for port redirection.
- Developed a modern information management web application using **Angular**, backed by **Firebase Firestore** and **Firebase Authentication** for real-time data and secure access control.

FULL STACK SOFTWARE ENGINEER – VALMORE TECHNOLOGIES – 01/05/2023 – 09/2023 – REMOTE, GREECE

In this role, I collaborated with a cross-functional team of developers and QA engineers to enhance a high-traffic web platform serving thousands of daily active users. Key responsibilities included:

- Developing responsive and accessible front-end components using HTML, CSS, and JavaScript.
- Designing and implementing RESTful APIs with **Express.js** to support new platform features.
- Writing automated integration tests using **Jest** to ensure the reliability and robustness of back-end services.

FULL STACK SOFTWARE ENGINEER – FLARMIO – 01/10/2021 – 01/05/2023 – REMOTE, GREECE

In this role I was a productive member of an Agile team team that maintained a web application with hundreds of users while helping out a second team with the development of a mobile application. My responsibilities were:

- Developing code for new features and maintaining already existing code based on **ReactJS**, **React Native** and **TypeScript**.
- Writing automated e2e and integration tests using **Cypress IO**.
- Implementation of CI for automated tests using **GitHub actions**.
- Building back-end software using **Express.js** and **MongoDB** while exposing the backend through **GraphQL** APIs.

EDUCATION AND TRAINING

Kavala, Greece

COMPUTER ENGINEERING Technological Educational Institution of Eastern Macedonia and Thrace

CERTIFICATE PROFICIENCY IN ENGLISH Michigan

LANGUAGE SKILLS

Mother tongue(s): **GREEK**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C2	C2	C2	C2	C2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

PROJECTS

Free time coding

Besides writing code in professional settings, I enjoy writing code in my free time with the goal of exploring new technologies and expanding my expertise through various challenges and projects. Projects written in my free time revolves around JavaScript technologies such as **React Native**, **NextJS** and **Angular**. These projects can be found in the github link bellow.

RECOMMENDATIONS

George Kanellis Supervisor/Team Leader

"Stefanos combined strong technical skills with genuine ownership. He wrote clean, maintainable code, approached problems methodically, and could be trusted to take a feature from ambiguity all the way to delivery with minimal oversight. Whenever something important needed to be done well, Stefanos was one of the first people I thought of."
